

Making **STEM** Fun & Achievable

The A+ STEM Lab turns any classroom into a high-tech learning environment, with all the tools necessary to deliver dynamic, interactive lessons for science, engineering and math subjects. A+ STEM Labs make it possible for schools to deliver robust, technology-driven STEM education through hands-on activities and experiments that map easily to any curriculum. The technology is easily integrated within the classroom, helping teachers better manage classroom time, student evaluations and presentation of content. Each STEM Lab is configured for pre-k, elementary, middle or high school and literacy programs with subject specificity.

Teacher Approved

- Self-Sufficient
- Turn-Key Programs
- Classroom Management

Student Approved

- Hands-On Activities & Experiments
- Interactive Presentations
